- Enhancing Communication Abilities
- Critical Thinking
- Performing Well Under Pressure
- Leadership Skills

ACHIEVEMENTS

- Finished an Online Internship at OASIS INFOBYTE
- Completed HackerRank (SQL-BASIC) Practice
- Completed WEB DESIGN BOOTCAMP By LetsUpgrade
- Achieved First Position in Academics Curriculum in University

PROJECTS

Online System for Ordering Food
- Created a Food Ordering System with Java Server Pages (JSP) and Servlets. Designed intuitive interfaces for menu browsing and order placement using JSP. Utilized Servlets for server-side request management and authentication. Integrated JDBC for seamless database operations.

Photostation
- Developed PhotoStation, utilizing PHP and MySQL, to provide streamlined booking solutions for special occasions. Simplified the hiring process for photographers and videographers, enabling users to easily browse, select, and book professionals for their events. Contributed to efficient event planning through user-friendly functionalities.

Bestcop
- BestCop, built with PHP and MySQL, manages IMEI details with admin-controlled functionalities for adding, updating, and deleting records. It includes features for bulk data import from Excel and robust tracking capabilities. BestCop streamlines IMEI management, ensuring efficient data organization and retrieval for seamless operations.

Online Shopping System
- Developed a professional ecommerce solution using JSP and Java Servlets, with MySQL integration for database management. Empowering customers to securely explore, purchase, and manage orders, the platform ensures a seamless shopping journey. Featuring streamlined navigation and reliable transaction processing, it enhances the online retail experience for optimal efficiency.

enotes
- eNotes, developed on the ASP.NET framework using C#, with MSSQL database integration, enables efficient note management. Users can edit and delete notes seamlessly. Integration with ChatGPT provides on-demand assistance and support for note-related queries. This application simplifies online note maintenance, enhancing productivity and organization.

PetStore
- The online pet store system I developed using PHP and MySQL enables seamless browsing and purchasing of pet-related products. It provides users with a diverse selection of items catering to various pet needs. The system aims to enhance user experience by offering a convenient and efficient platform for pet enthusiasts to shop online.

HR Analytic Dashboard
- This HR Analytics Dashboard, built using Power BI, offers dynamic visualizations depicting employee attrition rates. It explores various factors such as age, job role, salary, work experience, and department to provide actionable insights. With interactive charts, it facilitates data-driven decision-making for HR professionals, aiming to enhance retention strategies effectively.
